▶ Description

Libero 2.0 is an electronic and automatic cabinet door opener. Mainly used with our popular waste management systems like E and Euro Cargo. An integrated LED light indicates the sensor position. It's your foot that activates the sensor located in the plinth area. The device pushes out the wastebin and allows a hand's free opening and access! This device also works with wastebins equipped with slow motion runners. It has never been as easy to dispose of the waste!

Application

Base cabinets with no frame on the bottom, and equipped with top mount waste bins and common bottom drawers. Mainly in kitchen application

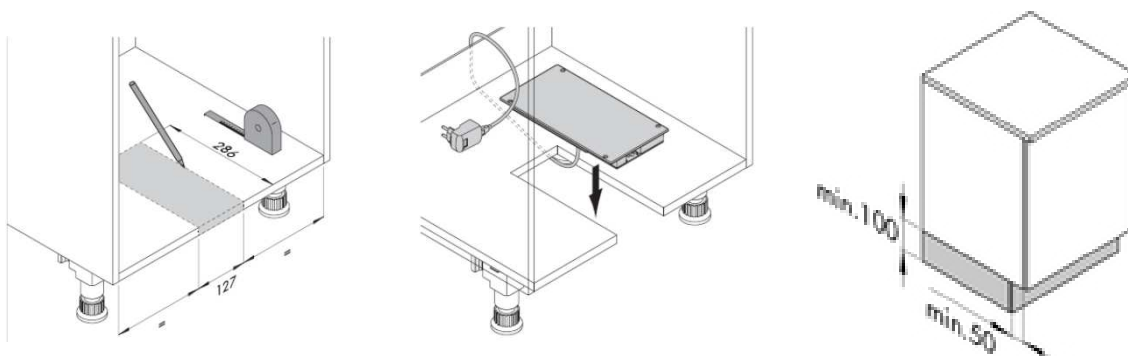

Product features

- For base cabinets from 300mm to 600mm (12" to 24") equipped with top-mount hangthru wastebins like Eurocargo, E-cargo... (3614,4614,3619,4619 series..).
- Mounts in the front & bottom section of the cabinet (doesn't mount when frame at the bottom of the cabinet).
- Low voltage device, 5 V input, with Micro-USB socket.
- Power-supply by charger/ transformer for 110 V to 230 V outlets, with 2m Micro-USB / USB cable and international adapters (all included in the set).
- Easy operation by foot sensor. No unintended opening.
- Integrated location lighting, may be dimmed and switched off with smartphone app.
- Push-out force adjustable with smartphone app. Product is delivered with a medium force set up by manufacturer.
- Intelligent control, identifies obstacles thanks to friction clutch system.
- Splash water-proof according to IP 21 certification
- UL, CSA certified.
- Settings and adjustments via Hailo Smart-phone app for Android and IOS
- Independent WLAN secured against access from www.
- Extension will vary depending on weight of content and width of the cabinet.
- Could be used with most common bottom drawers but application shouldn't exceed 40kg (88lbs) and 600mm (24") wide cabinet application.

No.	Description	Product Dimensions L x P x H
3697030	ELECTRONIC DOOR OPENER WHITE	157mm x 300mm x 33mm 6 1/8" x 11 3/4" x 1 1/4"

Technical Information

A simple opening to be made in the cabinet bottom allows to easily install the system with only 4 screws. Not any further brackets needed.

System settings such as lighting on/off, brightness and ejection force can be adjusted via the Hailo Home app. You need an intelligent mobile phone with WI-FI connection, choose the QR codes according to your mobile type and download the app.
