

## New: ECODRILL with a drilling depth stop

### Precise Blum hinge drilling with ECODRILL

ECODRILL is a rugged hand tool that is well suited for use at the installation site. With ECODRILL you are guaranteed to drill the exact Blum drilling pattern for any hinge. This enables the efficient assembly of INSERTA, EXPANDO and screw-on hinges.

### ECODRILL for fast and precise assembly

Once you have marked the desired hinge location, ECODRILL is simply locked onto the work-piece using the clamping levers. The Blum pattern can then be drilled using a standard hand drill. The Depth Stops on ECODRILL can also be used to mark locations for any Blum screw-on hinge.

### ECODRILL includes:

- 1 pc. ECODRILL drilling template
- 1 pc. 35 mm Ø drill bit for fittings
- 2 pc. 8 mm Ø drill bit for dowels
- 2 pc. Allen keys
- 2 pc. Depth Stops

ECODRILL

M31.1000.10

### ECODRILL applications

#### Precise pre-drilling

Using ECODRILL, hinge drilling is exact and easy. ECODRILL is the ideal tool for INSERTA and EXPANDO hinges.

#### Optional marking

Using optional Depth Stops on the 8 mm drill bits, enables you to clearly mark location holes for screw-on hinges

### ECODRILL advantages

- Simple and efficient assembly of Blum hinges
- Precise drilling for Blum hinges
- Accurate marking for location of screw-on hinges using Depth stops
- Suitable for „on-site“ installation jobs
- Exact assembly ensures problem-free functions
